C1887P4

Enclosed files (2):

GMCore.dll	2,445,312 Bytes	02-18-2005	Rsadmin.exe	2,830,336 Bytes	02-18-2005
Maext.dll	221,184 Bytes	02-18-2005	rsserver.exe	188,416 Bytes	02-18-2005
Hfnetchk.exe	1,877,176 Bytes	01-11-2005	Readme.pdf		04-21-2005
Mmndb.dll	385,024 Bytes	02-18-2005			

This patch gets applied to:

- Primary Command Server (PCS)
- Secondary Command Server(s) (SCS)
- Remote Console Machines (RC)
- Relay Server(s) (RS)

To use:

1) Stop all Cenergy processes (including agent, server, console, IIS, etc)
  a) Stop the Cenergy agent process (right click on the tray icon and select unload)
  b) Stop the Cenergy Server service
  c) Stop the Cenergy Agent service
  d) Stop IIS (either by stopping the IIS admin service, or running iisreset /stop from the command line)

2) Install GMCore.dll, rsserver.exe, rsadmin.exe, mmndb.dll to the Cenergy Installation folder (by default c:\program files\Tally Systems Corp\Cenergy)
  a) Backup GMCore.dll, rsserver.exe, rsadmin.exe, mmndb.dll from the Cenergy Installation folder
  b) Copy the new GMCore.dll, rsserver.exe, rsadmin.exe, mmndb.dll to the Cenergy Installation folder

3) Install hfnetchk.exe to the Cenergy Patch Content Bin folder (by default c:\program files\Tally Systems Corp\Cenergy\patch content\bin)
  a) Backup hfnetchk.exe from the Cenergy Patch Content Bin folder
  b) Copy the new hfnetchk.exe to the Cenergy Patch Content Bin folder

4) Only for PCS and SCS - Install GMCore.dll, mmndb.dll to the Cenergy CGI-BIN folder (by default c:\program files\Cenergy\cgi-bin)
  a) Backup GMCore.dll, mmndb.dll from the Cenergy CGI-BIN folder
  b) Copy the new GMCore.dll, mmndb.dll to the Cenergy CGI-BIN folder

5) Restart all Cenergy processes
  a) Start IIS (either by starting the IIS admin service, or running iisreset from the command line)
  b) Start the Cenergy Server service
  c) Start the Cenergy Agent process -- executing RSTATE.EXE from the Cenergy Installation folder (by default c:\program files\Tally Systems Corp\Cenergy)8) Deploy the 'Install Patch Components' package to all of your existing machines to install the new patch manager files. [*if not re-deployed the client will not get the new Hfnetchk.exe file,since this file is not updated by the 'update patch content' package*]
